### Tuberculosis Targeted Testing Guidelines for Health Care Providers

**Tuberculosis Infection Risk:**

Review the following risks and administer a Mantoux TB skin test if child is in one or more categories. The TB test is administered confidentially as part of the health examination. Do not record administration of any TB test or related information on this form.

- Recent immigrant (< 5 years), frequent visitor to TB endemic areas
- Close contact to active TB case
- Frequent contact with adults at high-risk for disease, HIV+, homeless, incarcerated, illicit drug user
- HIV+ or have other medical conditions that increase the risk to progress from infection to disease, e.g., chronic renal failure, diabetes, hematologic or any other malignancy, weight loss > 10% of ideal body weight, on immunosuppressive medications

**Active TB Disease Risk:**

- Does the child exhibit signs/symptoms of tuberculosis (e.g., cough for three weeks or longer, weight loss, loss of appetite)?
- If symptoms are present, work-up or refer for TB disease evaluation.
