

## AJHS AP Computer Science Summer Assignment

Students should create an account on [code.org](https://code.org) using their student number as their username and normal school password. They will join my class by typing in VFDJZP as the section code.

Their goal is to complete Unit 3 Lessons 4 through 10. This will expose them to basic coding concepts and will create a strong foundation for them. The introductory videos will show how to use the coding platform and if they read the instructions they will have no problem.

Mr. Lozano
