

Incoming Algebra Students

On-Ramp (pre-algebra review) on Algebra Nation

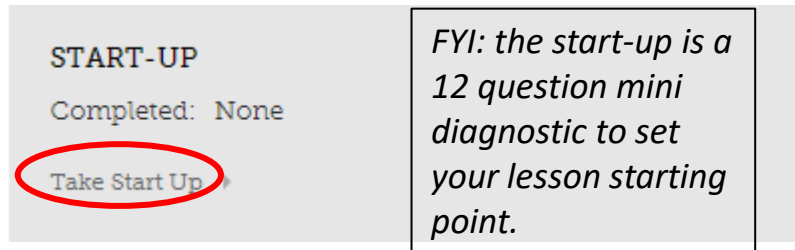

1. From the DCPS oneview page, click the Blended Learning drop down menu, choose Algebra Nation.

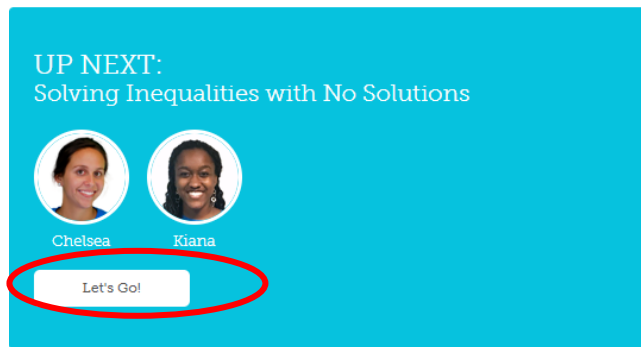

2. Use your DCPS login to access Algebra Nation. On the top left, use the drop down menu to select On-Ramp (pre-algebra review).

3. Go to the **BOTTOM RIGHT** and select Take Start-Up diagnostic.

4. After completing the Start-Up diagnostic, look for this blue block in the **TOP RIGHT**, select your presenter and start the lesson.

Your summer assignment is to complete the Start-Up diagnostic and then **complete the first TEN lessons assigned to you**. Each lesson has a 3-4 minute video followed by two assessment questions. There are worksheets that match the video lesson available to download and print if desired, by clicking the "Study Guide" link next to each video. Your work will be recorded via your login for your teacher to see the results and record your summer work grade.
