MEDICATION GUIDELINES

A. Administration of Prescription and Non-Prescription Medication

- 1. Whenever possible, medication schedules should be arranged so all medication is given at home.
- Medication must be delivered to the school by the parent/guardian in the original container and the Medication Administration Authorization form must be signed by the parent/guardian and health care provider (Medical Doctor, Physician Assistant, or Advanced Practice Registered Nurse).
- Medication Administration Authorization forms must be completed and signed by parent or guardian and health care provider for <u>each medication</u> given and each time <u>any</u> changes occurs.
- 4. The medication label must indicate the student's name, medication name, health care provider's name, dosage, time to administer, and expiration date.
- 5. If the medication requires special equipment for administration, the parent must supply the necessary item.
- 6. All medications to be administered by school personnel shall be <u>received</u>, <u>counted</u> and <u>stored</u> in original containers. When a medication dose is given to a student, it <u>must be recorded</u>. If dosage is not recorded, it will be assumed that the student did not receive the required dose.
- 7. When the medication is not in use, it shall be stored in its original container in a secure fashion **under lock and key** in a location designated by the principal.
- 8. Medication that is not picked up at the end of the school year by the parent or guardian will be **destroyed**.

B. Self-Carry Medication

- 1. Once a Medication Administration Authorization form is completed by the parent, student and health care provider indicating the need for the student to self-carry a medication is on file at the school, the student may carry the following medications: rescue inhaler, anaphylaxis supplies, diabetic supplies, and pancreatic enzymes.
- 2. School staff is not responsible for monitoring the administration of self-carry medication.
- It is the parent or guardian's responsibility to ensure that the student has their medication during the school day and that the medication is properly labeled and not expired.
